### Project Title

Learning Management System - devskills

### Problem Summary

Traditional education often faces limitations such as geographical constraints, rigid schedules, and limited access to high-quality instructors. This project aims to address these challenges by developing an accessible and engaging e-learning platform that provides users with flexibility, personalized learning experiences, and a wide range of high-quality educational content.

### Detailed Description of the Problem

**Limited Access:** People in remote areas or with limited resources struggle to find good schools and experienced teachers.

**Inflexible Schedules:** Traditional classrooms have rigid schedules that don't always fit everyone's needs and commitments.

**High Costs:** Education can be expensive, especially for people who don't have a lot of money.

**Lack of Personalization:** Traditional teaching often doesn't consider how different people learn best.

### Expected Outcome

**Help more people learn:** Good education will be available to everyone, no matter where they live or how much money they have.

**Make learning easier:** People can learn whenever they want and at their own pace.

**Make learning more affordable:** It will cost less because we don't need expensive buildings.

**Make learning fun:** We'll use games and other fun things to keep people interested in learning.
